

Pasture Fencing • LIVESTOCK PENS • LIVESTOCK SHELTERS

100'X40' Livestock Pens

Permitter Free Range fencing -
enclose off for Goats to free range

Neighbor property

Permitter fence lines
completed in 2023

100' X 40' Livestock Pens and Shelters

1. Significantly more secure for the animals
2. Modular – internal pens can be partitioned and changed as the operation grows
3. Less material & time commitment then erecting new pens or corals for each group of livestock
4. Less capital exposure and less waste of materials

LIVESTOCK PEN AND SHELTER'S LOCATION

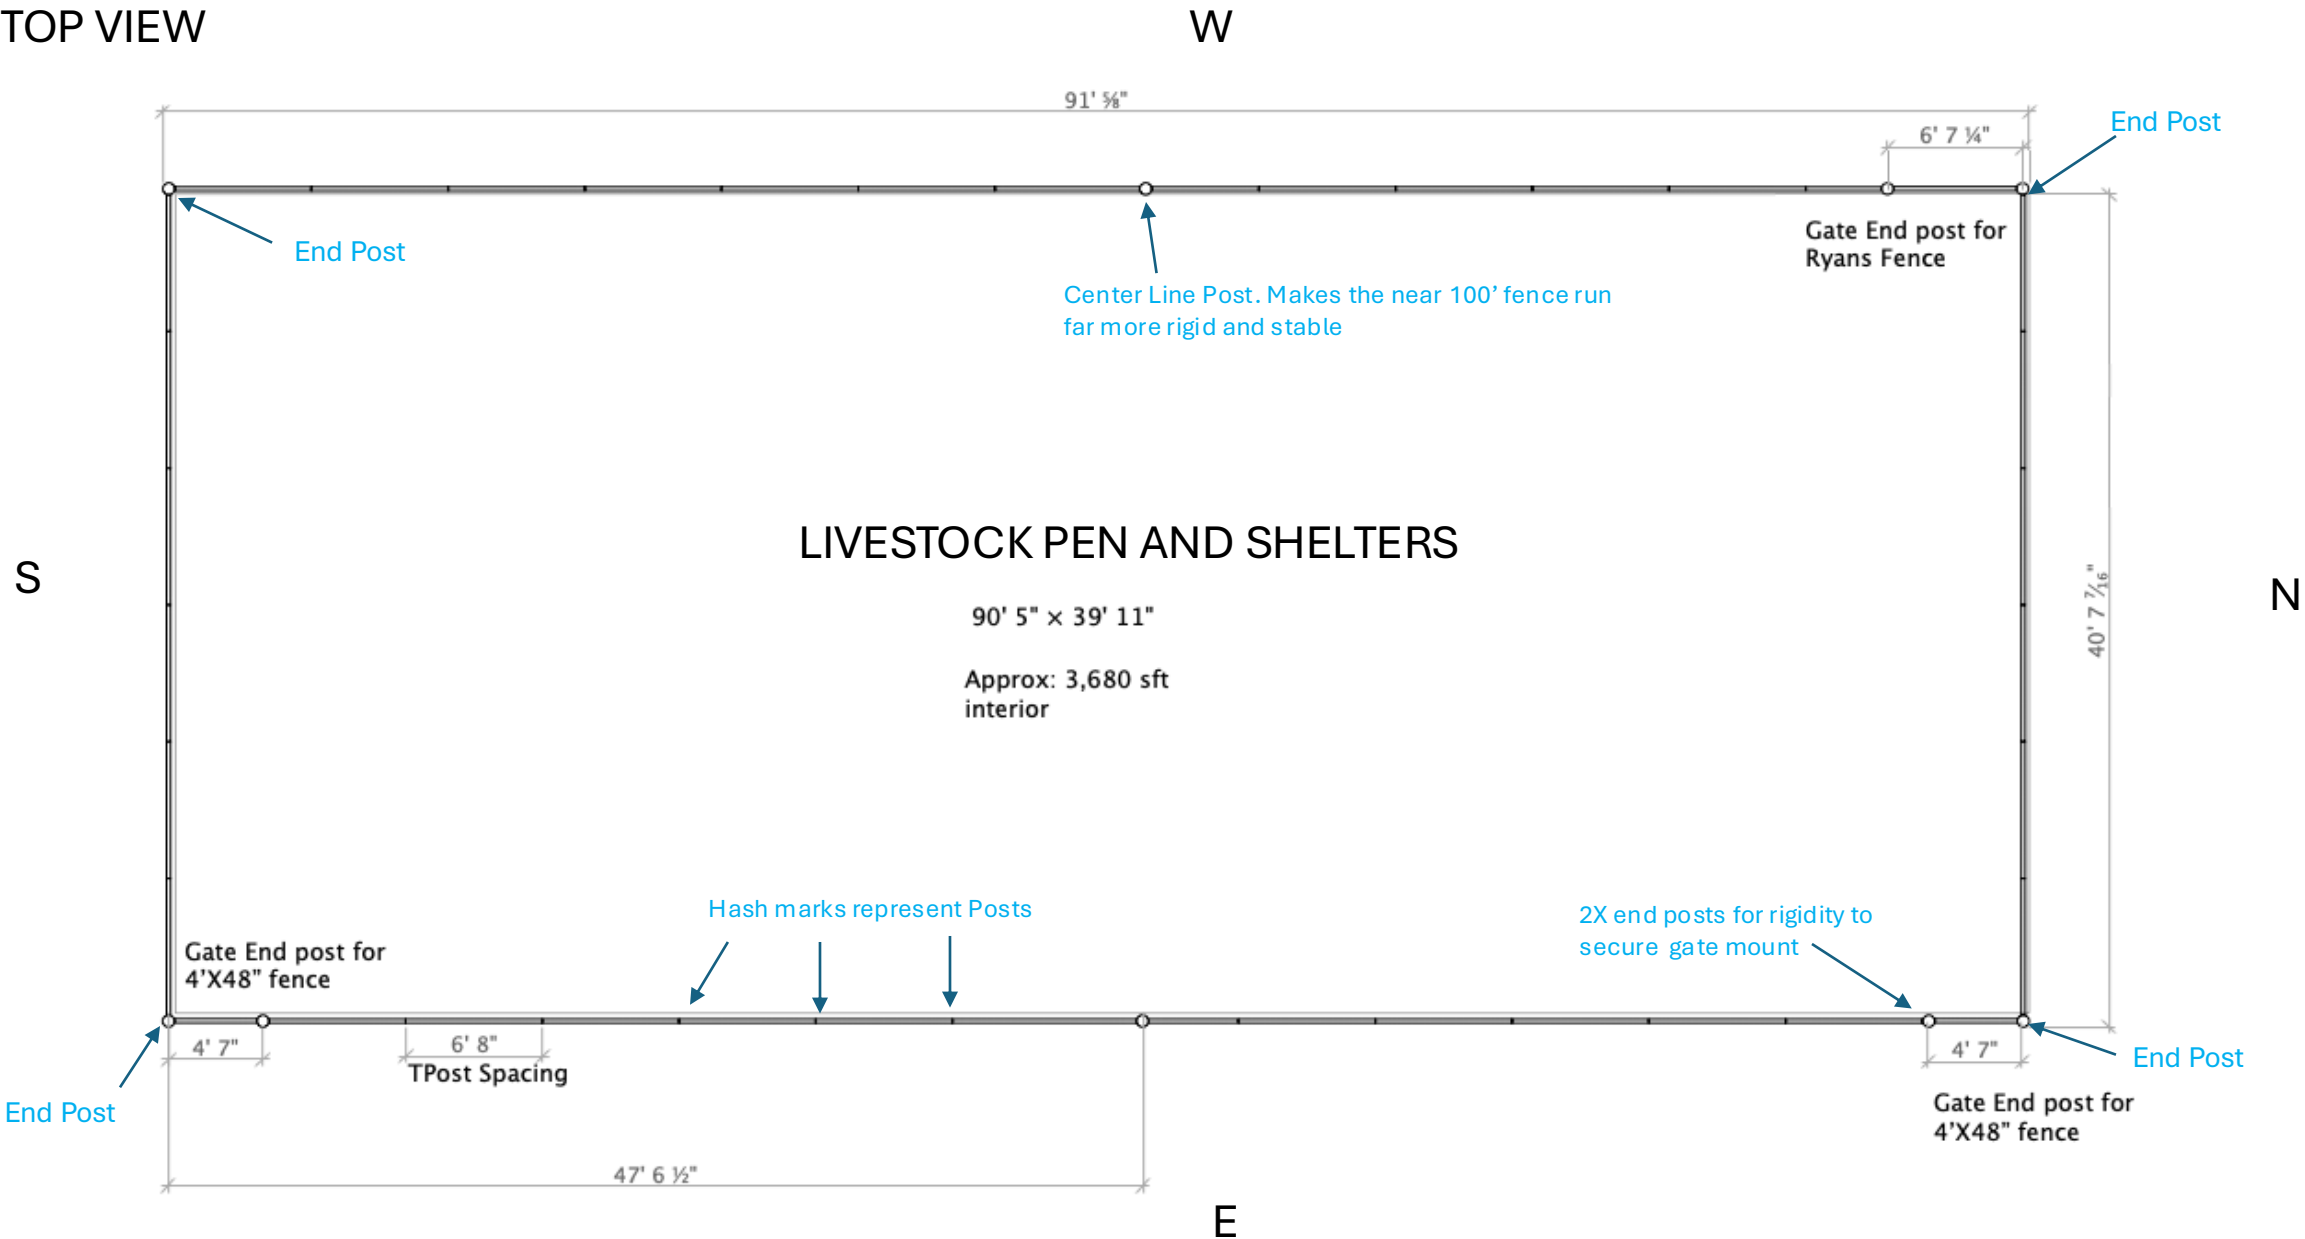

The pasture side is sloped, the area outlined was excavated and graded in 2023 in preparation for the build-out so that it is "flat". The area occupies approximately 120' X 60' of flat space at the top of the hill.

Notes:

1. Elevation view not needed as this is quite basic.
2. T-posts were eliminated and 6" fence posts to be used for the livestock pen perimeter posts.
3. Woven fence is 60" (5feet) in height. Comes in 100' rolls and features: 11.5 gauge, galvanized , 2"X4" spacing
4. See the actual Materials List Excel sheet for actual BOM (build of materials)
